Accra, Ghana | dkpakpo46@gmail.com | + 233 54 345 9734 | ORCID 0009-0001-9323-4142

Education

M.Phil. Epidemiology and Disease Control

2023 to 2025

University of Ghana School of Public Health

Accra, Ghana

CGPA: 3.35

Thesis: Comparative Analysis of Antimicrobial Resistance Patterns and Associated Risk Factors among Hospitalized Patients in Greater Accra, Ghana

- Hospital based unmatched case control study of which hospitalized patients carry multidrug resistant organisms and which exposures predict that carriage
- Characterized resistance patterns across the hospital population and identified the risk factors associated with multidrug resistant infection
- Produced evidence for hospital antimicrobial stewardship, infection prevention and control, and national resistance surveillance

Selected graduate coursework: Public Health Surveillance II, Advanced Epidemiology, Advanced Biostatistics, Disease Outbreak Investigation and Response, Principles of Field Epidemiology, Laboratory Methods, Data Management Information Systems

M.B.A. Health Services Management

2020 to 2022

Kwame Nkrumah University of Science and Technology

Kumasi, Ghana

CWA: 71.50

B.Sc. Biomedical Laboratory Science

2013 to 2017

University for Development Studies

Tamale, Ghana

CGPA: 3.45/5.0

Research Interests

- Infectious disease epidemiology and antimicrobial resistance
- Disease surveillance, epidemic intelligence and surveillance system evaluation
- Public health emergency management and global health security
- Public health informatics and health data science for outbreak detection
- One Health and implementation research in national health systems

Research Experience

Field Epidemiology Resident

Completed Dec 2025

Ghana Field Epidemiology and Laboratory Training Programme

Accra, Ghana

Ghana Health Service and University of Ghana School of Public Health

- Analyzed ten years of childhood immunization records across Greater Accra, 2014 to 2023, measuring age appropriate completion and coverage of key vaccines
- Investigated a foodborne disease outbreak linked to Asaana, a local maize beverage, in Ningo-Prampram using a retrospective cohort design
- Evaluated the HIV surveillance system in Krowor Municipality against the 95-95-95 targets, identifying where the system loses patients between diagnosis, treatment and viral suppression
- Analyzed nine years of meningitis surveillance data from the Upper West Region, 2015 to 2023
- Assessed population mobility patterns and transmission risk at high interaction sites along the Ghana Togo border, across border corridor relevant to outbreak importation

- Assessed wellness clinic awareness and utilization among traders in Madina Market, an urban market population in Ghana

Manuscripts Under Review

Addotei DK, et al. Age-appropriate completion and coverage of key childhood vaccines in Greater Accra, Ghana, 2014 to 2023. Submitted to *BMC Public Health*.

Addotei DK, et al. Foodborne disease outbreak associated with Asaana, a local maize beverage, consumption in Ningo-Prampram, Ghana: a case-control study. Submitted to the *Journal of Food Protection*.

Addotei DK, et al. Awareness and Utilization of Ghana Health Service Wellness Clinics among Urban Market Traders in Accra, Ghana. Submitted to the *Journal of Community Health (JOHE.)*

Kunateh M, Addotei DK, et al. Meningitis in the Upper West Region, Ghana, 2015 to 2023: a surveillance data analysis. Submitted to the *Journal of Interventional Epidemiology and Public Health*.

Manuscripts in Preparation

Addotei DK, et al. Clinical and Environmental Factors Associated with Antimicrobial-resistant Bacterial Infection among hospitalized patients in Greater Accra, Ghana: A multi-centre Case-control Study

Addotei DK, et al. Evaluation of the HIV surveillance system in Krowor Municipality, Ghana: gaps and opportunities for achieving the 95-95-95 targets.

Addotei DK, et al. Population mobility patterns and disease transmission risks at high interaction sites along the Ghana Togo border.

Addotei DK, et al. Extensively Drug-Resistant Bacteria and Antimicrobial Susceptibility Patterns among Resistant Isolates from Hospitalized Patients in Greater Accra, Ghana: A Multicentre Hospital-Based Study

Conference Presentations

Addotei DK (2025). *Genomic insights into the SARS-CoV-2 outbreak* [Oral presentation]. Africa CDC Bioinformatics Conference, Addis Ababa, Ethiopia.

Addotei DK, et al. (2025). *Awareness and utilization of wellness clinic among traders in Madina Market, Ghana* [Oral presentation]. Ghana Field Epidemiology and Laboratory Training Programme Scientific Conference, Ghana.

Honors and Awards

- Fellow, Ghana Field Epidemiology and Laboratory Training Programme, the national field epidemiology training program of the Ghana Health Service and the University of Ghana School of Public Health (Dec 2023)
- Africa CDC Bioinformatics Fellowship, Africa Centres for Disease Control and Prevention, a continental competitive fellowship in pathogen genomics (Dec 2025)
- Abstract accepted, 10th International Workshop on Adolescence, Sexual and Reproductive Health and Rights, and HIV, Bangkok, Thailand (2026)

Teaching and Curriculum Development

Curriculum Developer and Facilitator

2026 to Present

Ghana Field Epidemiology and Laboratory Training Programme

Accra, Ghana

- Serve on the technical committee building the Public Health Informatics curriculum for Ghana's national field epidemiology training program
- Facilitate training workshop for national Health Informatics Officers

Guest Lecturer

2023, 2024

Lancaster University Ghana

Accra, Ghana

Daniel Addotei Kpakpo

Page 2 of 5

Professional Experience

Epidemiologist

Feb 2026 to Present

National Public Health Emergency Operations Centre, Ghana Health Service

Accra, Ghana

- Lead surveillance and epidemic intelligence for national public health emergency preparedness and response
- Produce the national Situation Reports and surveillance analyses that operational decisions are made from during an activation
- Support Incident Management System activation and multi sectoral coordination during declared public health emergencies
- Develop national preparedness policy, strategic plans and operational guidance as a standing technical committee member
- Run contingency planning and simulation exercises, and build the public health informatics that support them

Laboratory Epidemiologist and Quality Assurance Manager

May 2021 to Present

Ghana Infectious Disease Centre

Accra, Ghana

Ghana's dedicated infectious disease treatment facility

- Lead the laboratory quality management system and the continuous quality improvement program
- Conduct epidemiological analyses for infectious disease surveillance, antimicrobial resistance and operational research
- Coordinate laboratory data analysis and reporting into clinical and public health decision making
- Contribute to outbreak investigations, surveillance system evaluations and implementation research
- Mentor laboratory professionals, students and field epidemiologists in quality management and applied epidemiology

Laboratory Manager

Mar 2019 to Feb 2021

Perez Medical Laboratory Limited

Accra, Ghana

- Managed laboratory operations, personnel and the quality management system
- Strengthened compliance with laboratory quality standards and diagnostic reporting requirements
- Coordinated laboratory services with clinicians to improve turnaround and reporting quality

Medical Laboratory Scientist

Apr 2017 to Jul 2018

Greater Accra Regional Hospital

Accra, Ghana

Tertiary referral hospital

- Performed diagnostic laboratory investigations in a tertiary referral setting
- Conducted microbiological investigations, including antimicrobial susceptibility testing
- Maintained compliance with laboratory quality, biosafety and infection prevention standards

National Technical Committees and Service

- Ghana Emergency Preparedness and Initial Response Plan for Ebola Disease Caused by Bundibugyo Virus (Jun 2026)
- Ghana Public Health Emergency Operations Centre Handbook (Jan to Apr 2026)
- Ghana Public Health Emergency Operations Strategic Plan, 2026 to 2030 (Jan to Mar 2026)

- National Public Health Point of Entry Contingency Plan (Jun to Aug 2025)
- National Evaluation of Mass Drug Administration for Onchocerciasis, Ov16 ELISA Seroprevalence (May 2025)

Short Courses and Professional Development

- Postgraduate Certificate in Machine Learning and Artificial Intelligence, Thrive Africa Institute and Koforidua Technical University (Oct 2025)
- Postgraduate Certificate in Advanced Data Analytics, Thrive Africa Institute and Koforidua Technical University (Oct 2025)
- Descriptive and Qualitative Methods in Outbreak Investigation, TEPHINET
- Management and Facilitation of After Action Reviews, World Health Organization
- Leadership and Management in Health, University of Washington
- Fundamentals of Global Health Research, University of Washington
- Good Clinical Practice (ICH-GCP), The Global Health Network

Professional Affiliations and Licensure

- Registered Medical Laboratory Scientist, Allied Health Professions Council, Ghana (2017 to Present)
- Member, Africa Society for Laboratory Medicine (2024 to Present)
- Member, Africa Field Epidemiology Network (2023 to Present)
- Member, Federation of Epidemiologists Network, Ghana (2023 to Present)
- Member, Ghana Medical Laboratory Scientists Association (2017 to Present)

Technical Skills

- Study designs: case control, retrospective cohort, surveillance data analysis
- Programming and data: Python (pandas, NumPy, Matplotlib), SQL, Git and GitHub, QGIS
- Surveillance platforms: DHIS2, SORMAS, EIDSR
- Laboratory: antimicrobial susceptibility testing, laboratory quality management systems, biosafety
